ALMANACK,

FOR THE STATE OF

Connecticut;

FOR THE YEAR OF OUR LORD,

1806;

BEING THE THIRTIETH OF THE INDEPENDENCE OF THE UNITED STATES.

NEW-LONDON:

PRINTED AND SOLD BY

CADY & EELLS.

OBSERVATION.

THE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing:

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

Connecticut

REGISTER,

FOR THE YEAR OF OUR LORD,

1807;

Being the Thirty-First of the Independence of the United States.

NEW-LONDON:

PUBLISHED BY CADY AND EELLS.

OBSERVATION.

THE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing:

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting you will have the length of the day; and double the time of the sun's rising will be the length of the night

The editors wish to make the Register as well a valuable companion to travellers, as an useful and convenient vehicle of information to the public generally; and in promoting these objects no exertions, hereafter, will be spared. *Dec.* 1806.

THE

Connecticut

REGISTER,

FOR THE YEAR OF OUR LORD,

1808:

BEING THE THIRTY-SECOND OF THE INDEPENDENCE OF THE UNITED STATES.

NEW-LONDON:

PUBLISHED BY EBENEZER P. CADY.

OBSERVATION.

THE hour of night is, many times, more conveniently estimated by the moon's southing, than her rising and sitting.

To find the moon's southing:

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting you will have the length of the day; and double the time of the sun's rising will be the length of the night.

COUNTERFEIT BANK BILLS.

CHESHIRE BANK, *Keene, (N. H.)* Four, Ten and Thirty; Tens of the first impression. The word "TEN" in capitals in the margin, not well done and the words "Cheshire Bank," which lean on the left in the second line, not so fair as the genuine. Two's are altered to Ten, and Three's to Thirty. Four's also of the first impression, dated July 9, 1805 and payable to F. Alexander; paper lighter and more spongy than the genuine. Another denomination of Four are in circulation, payable to James Munn; paper much thinner than the genuine. Fives, dated Keene, October 10, 1804, badly executed. ☞ The last impression of this Bank are all Stereotype.

COOS BANK, *Haverhill, (N. H.)* One dollar bills of the Stereotype, altered to Four and Six—well done.

EXCHANGE BANK, *Providence, (R. I.)* Fives, poorly done; paper darker than the genuine. Fifties altered from smaller ones, well done; they bear, however, a light-house on the left, which the good do not.

EXETER BANK, *(N. H.)* Stereotype Fours, badly altered from One. The intersecting lines are not parallel, and the "Four," and letter *S* in the word *Dollars*, can be readily detected by the eye. Stereotype Sixes altered from one, extremely well done.

FARMER'S EXCHANGE BANK, *Gloucester, (R. I.)* All denominations counterfeited. In the Two's, the *a* in 'demand' projects above the other letters. In the true Fives, the word FIVE in large capitals, extends over the whole bill; and the *I* continues all the way down in three strokes; in some of the counterfeits, it goes into two strokes when it enters the *a* in "Exchange," but not in all. The impression of the Tens, is smaller, and not so fair as the genuine. This

ank now issues Stereotype bills. ☞ Since the above etection, the Fives have had all the errors corrected; ie letters are cut handsome, and will bear a close kamination. The *plough*, however, joins the tails f the oxen, which in the genuine does not; the enraver's name is done with a pen, and hardly legible. ome counterfeit three's are also in circulation, well nitated; the Ones are well done.

HARTFORD BANK, *(Con.)* Threes altered to hirty; but the letters added are so close together, iat they are easily known. Threes are counterfeitd, badly done. Some Two's have just appeared, ie paper of which is lighter than the genuine, and ie letters are larger and more clumsy.

MANHATTAN and MERCHANT'S BANKS, *New-York* Five dollar bills of the former bank, and Fives nd Tens of the latter bank are in circulation; poorly nitated, and easily known from the genuine.

MASSACHUSETTS BANK, *Boston.* Tens—in the ord "Dollars," at the top, the two *ll*'s and the *a* nd *r* join; in the true bills they do not. The B, in Boston,' is not so handsome, the *o* is upright, *s* not o good, and the *t* more sloped; the whole word, in ict, badly imitated. In the ornamental part of the rue bills, 'Ten, 10,' at each end, are thick black nes; in the false, they are only dark shaded.

NANTUCKET BANK. Two, Three and Five. The ives are on a dark oilish paper, and apparently one with a pen. The Two's are a tolerable imitaion, impression smaller, and the signatures poorly one. The letters of the Threes are larger than the rue ones; but on comparison are easily detected. ☞ Many Ten dollar bills are also in circulation, altered from a Two.

UNION BANK, *New-London.* Ten and Twenty: ltered from smaller bills, and hard to be discovered.

NEW-YORK STATE BANK. Five—the two figures f 5 at each top end of the bill look thick and blurred, he writing is crooked, and the paper soft and spongy.

NORWICH BANK. Fives altered to Twenty-five; the 25, in German text, is shaded by a scrawl; in the genuine it is not. Ones to Ten, well done. Those Fives which have letters passing through the bill, also counterfeited, badly done, particularly in the penmanship.

PACIFIC BANK, *Nantucket.* Tens—clumsily executed; the Cashier's name spelt Tristrum instead of Tristram Hussey. Fives of this Bank have lately got into circulation; paper and impression much like the genuine; signatures well done; but in the third line of the bill, the word Nantucket is more crooked than the true ones.

PROVIDENCE BANK, *(R. I.)* John I. Clarke, president, Olney Windsor, cashier. Two's, signed *John Innes Clark*, president, dated Jan. 9, 1805, and better executed than the original. In the word *Five* in large capitals across the bill, the *F* completely covers the small letter in the word *Five*, 2d line from top; in the genuine, it is covered but in part. Some Ten dollar bills are in circulation, altered from a smaller denomination.

RHODE-ISLAND UNION BANK, *Newport.* Threes, poorly done. The words 'Three dollars,' in capitals at the top, badly imitated, particularly the S. Tens lately got into circulation.

SALEM BANK, *(Mass.)* Benja. Pickman, jun. president. and Jonathan Hodges, cashier; Four and Six. No Fours are issued by the bank; and the Six bears fictitious signatures of president and cashier.

SMITHFIELD UNION BANK, *(R. I.)* Three, Five and Seven; in the Threes the words "bearer" and "demand" are not cut so straight as in the genuine, which are dated June 3, 1805, and have not been numbered higher than 600; but the bad ones are, and the red ink has a yellowish cast. The Fives are of the first impression, and will compare closely; signatures poorly done; but there are Fives and Ones the signatures of which are well imitated by copper

plate writing. The true Sevens have five or six water marks, the bad none ; the flukes of the anchor higher and narrower, the foot of the female slimmer, and the toes turned up ; all which are not in the genuine. Twenty, altered from One : execution good, but may be detected from the word *twenty* in *figures*, which is very crowded.

UNITED STATES BANK. Five, Ten, Twenty, Fifty, and One Hundred dollar bills, are in circulation, of the various Branches. REGISTER,

FOR THE YEAR OF OUR LORD,

1809:

BEING THE THIRTY-THIRD OF THE INDEPENDENCE OF THE UNITED STATES.

NEW-LONDON:
PRINTED BY SAMUEL GREEN.

OBSERVATION.

THE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing:

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

Chronological Cycles for the year 1809.

OGY COLLECTION

THE

Connecticut

REGISTER,

FOR THE YEAR OF OUR LORD

1810:

BEING THE THIRTY-FOURTH OF THE INDEPENDENCE OF THE UNITED STATES.

NEW-LONDON:
PRINTED BY SAMUEL GREEN.

OBSERVATION.

THE hour of night is, many times, more conveniently estimated by the moon's southing, than her rising and sitting.

To find the moon's southing:

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting you will have the length of the day; and double the time of the sun's rising will be the length of the night.

Chronological Cycles for the year 1810.

Dominical Letter,	G	Solar Cycle,	27
Lunar Cycle or Golden Number,	6	Roman Indiction,	13
Epact,	25	Julian Period,	6521

Names and Characters of the Planets.

☉ or ☼ Sol or Sun. ☾ or ☽ Luna or Moon,
♅ Herschell. ♄ Saturn. ♃ Jupiter. ♂ Mars.
⊕ Tellas, or Earth. ♀ Venus. ☿ Mercury.

Names and Characters of the Aspects.

☌ Conjunction, or planets situated in the same longitude.

□ Quartile, when they are 90 degrees distant from each other.

☍ Opposition, when they are 180 degrees distant.

△ Trine, when they are 120 degrees distant.

⚹ Sextile, is when two planets or stars are 60 degrees distant.

ECLIPSES IN THE YEAR 1810.

THERE will be but two Eclipses this year, and both of the Sun. 1216994

I. The first will be April 3d, at 8 o'clock and 9 minutes, in the evening, invisible.

II. The second will be September 28, at noon; but by reason of the moon's south latitude, the penumbra will not quite reach our vertex, consequently it will be invisible to us: but in lat. 6° S. and long. 72½° W. on the main continent in South-America, there will be a central annular Eclipse on their meridian; exhibiting a bright ring of light round the Moon's body, appearing like a splendid gold ring.

FREEMEN'S MEETINGS.

FREEMEN'S-MEETINGS, throughout the State of Connecticut, are held annually on the third Monday in September, and on the Monday following the first Tuesday in April.
